BUILDINGS AND MONUMENTS,
MODERN AND MEDIÆVAL:
Being Illustrations of the Edifices of the Nineteenth Century, and of some of the Architectural Works of the Middle Ages.
By GEO. GODWIN, F.R.S.,
Fellow of the Institute of Architects; Corresponding Member of several Societies.

OPINIONS OF THE PRESS.

"The bold and effective woodcuts which have now appeared for some years past in the weekly sheets of our excellent contemporary *The Builder*, must be familiar to all who are the least interested in architecture, if it were only from the show they make amidst their fellows of the 'illustrated' press in the windows of the newsvendors. It will, we are sure, be very acceptable to such as set a higher value upon these prints than the ephemeral pleasure they give on their first appearance, to have smooth and well-printed impressions at a very moderate price. In the republication now before us, with the advantages of plump ink and tinted paper, they assume a beauty which some persons will be scarcely prepared to expect, who are not fully aware of the great importance of good printing to wood engravings."—*Gentleman's Magazine.*

"This cheap and handsome re-issue of the principal cuts which have appeared from time to time in *The Builder* is an exceedingly useful addition to illustrated literature. We know that work is read and purchased by many who have no connection with 'building;' there are, however, a class who but aware of the value or early city of its many engravings, and such persons will, no doubt, avail themselves of this handsome re-issue of them, printed on finer paper and with greater care, and accompanied with a proper amount of descriptive letter press."—*Art Journal.*

"A publication of much merit and interest. The articles are able and sensible, the engravings excellent."—*The Literary Gazette.*

"The idea of republishing in a separate and handsome form some of the best architectural subjects that have been given in *The Builder* was a good one. Besides being thus brought together within a comparatively small and convenient compass, separated from miscellaneous matter of only technical or temporary interest,—the woodcuts are so greatly improved in appearance that they scarcely seem to be from the same blocks as before. The same illustrations, or the same number of them, could not have been brought out at the same price had not the blocks been already executed, and had they not served their purpose in a periodical having an assured sale."—*The Athenæum.*

"Unparalleled is the artistic world for cheapness as well as for utility and beauty of effect." "It is among the cheapest and the best works of the kind ever published."—*The Observer.*

"This ought to be supported by public patronage, for it certainly affords, at a very moderate price, a greater quantity and variety of entertainment to the eye as well as to the mind than has hitherto been afforded by any popular architectural publication. It appears to us a judicious plan, illustrating new buildings, together with others of older date."—*The Globe.*

"This is a happy idea, most skilfully carried out. Fine printing, and a deep yellow paper, give a most charming effect to these vigorous and faithful illustrations of the edifices of the nineteenth century, and of some of the architectural works of the Middle Ages; and the work will thus worthily all a gap in pictorial literature—for we have no popular book of reference on modern architecture. Mediæval structures, moreover, have rarely been more effectively treated."—*Ecclesiastic Chronicle.*
